

Project Submission Guidelines

The course project will be submitted in 3 stages, each with separate deadlines:

- Proposal Report (due in week 2)
- Midterm Report (due in week 5)
- Final Report (due in week 11)

Each stage builds upon the previous one. Below are the detailed requirements for each report:

1. Proposal Report

The proposal should outline your project idea and work plan. It must include:

- Cover Page
 - Course name
 - Project topic name
 - Instructor's name
 - Student names and IDs
- Abstract
 - A brief explanation of the topic and the project's objectives.
- Task Allocation Table
 - A detailed breakdown of tasks by week and by team member.
 - The more specific the allocation, the higher the score.
 - A generic table filled only with "All" will result in a low score.
- Tools and Programming Languages
 - List the software, tools, and languages that will be used.

2. Midterm Report

The midterm report builds upon and expands the proposal. It must include:

- Updated Information
 - Revisions and improvements to the proposal (e.g., changes in task allocation, tools, or programming languages).
- Table of Contents
 - Organized structure of the report.
- Database Design
 - An ER Diagram representing the entities and relationships.
 - A Schema Diagram showing the logical structure of the database.

3. Final Report

The final submission consolidates all project work. It must include:

- Final Report
 - Written according to the provided guidelines and templates.
- Supporting Materials
 - Report
 - Presentation slides.
 - Source code.
 - Database files.
