ASSIGNMENT 1

1. Design a static web (which has at least 10 pages) in one of following topics:
   a. Online shop (mobile, flower, furniture,…)
   b. Personal site
   c. School site
   d. Professional site (about computer hardware, software introduction,…)
   e. Course website
   f. Company site
2. The site must be completely designed by CSS in which all pages' theme must be consistent
3. The navigation and link must be smooth.
4. All forms and submissions are received and store on web server by file named by pattern <page name>.data
5. Submission must only contain source code (you have to delete compiled files before submitting) and directly submit to our course website (Submission folder). Zip your project folder into a file named <your ID_your name>.zip
6. Submission must follow instruction at link http://125.234.238.107/web/digital-logic-design/annoucement/-/message_boards/view_message/113128 but apply to your course (Web Application Development)
7. The folder will be opened 5 days before deadline and close 2 days after deadline. All late submission will be rejected.
8. All email submission will be automatically deleted.
9. DEADLINE: 29/10/2011
